To create awareness about trees, their importance in our life and to save Mother Earth 50 saplings were planted in college premises that helps in enhancing the beauty and balance of the environment. Trees absorb harmful gases and emit oxygen resulting in an increase in oxygen supply.

चंडीगढ़-चंडीगढ़ के सेक्टर-26 स्थित गुरु गोविंद सिंह कालेज फॉर वूमन में पर्यावरण को संरक्षण को बढ़ावा देने में योगदान देने के उद्देश्य से कालेज की पर्यावरण सोसायटी 'वसुधा' की ओर से पौधारोपण अभियान का आयोजन किया गया। इस कार्यक्रम में कई तरह के पौधे लगाए गए। वही औषधीय पौधों के 50 पौधे भी रोपे गए। कालेज की प्रिंसिपल डा. जतिंदर कौर ने सोसायटी के सदस्यों के साथ पौधे लगाए और कहा कि हर दिन वन महोत्सव के रूप में मनाया जाना चाहिए और पर्यावरण को हरा, स्वच्छ, सुरक्षित और स्वस्थ रखने के लिए पौधों को उगाना चाहिए

## 20 Saplings of Desi Beriyan

To serve the community for ecological activism and to preserve the heritage.

Native species are the ecological basis upon which life depends, including birds and people. Without them and the insects that co-evolved with them, local birds cannot survive. So these saplings will provide habitat to birds and other wildlife of the locality. It is a major step in reducing the carbon footprints of the region and towards regeneration of ecosystem.

Objective of activity

Outcome of activity

To accelerate awareness of conservation of wildlife among the young population. Wildlife is an integral part of the environment. The wealth of the country is formed from them.

World Wildlife Day provides an opportunity to celebrate the many beautiful and varied forms of wild fauna and flora and to raise awareness of the multitude of benefits that their conservation provides to people. At the same time, the Day reminds our young population of the urgent need to step up the fight against wildlife crime and human-induced reduction of species, which have wide-ranging economic, environmental and social impacts.

Nature-walk was organised to enhance their awareness about the wetlands and our biodiversity

We are losing wetlands three times faster than forests. Yet, wetlands are critically important ecosystems that contribute to biodiversity, climate mitigation and adaptation, freshwater availability, world economies and more.

It is urgent that we raise awareness among our young population by arranging short visits to our neighbouring wetlands in order to reverse their rapid loss and encourage actions to conserve and restore them.
